
Welcome to *sx archipelagos*

Hello *sx archipelagos* is the latest born-digital articulation of the Small Axe Project. It is a peer-reviewed publication platform and adheres to the intellectual and aesthetic standards established by the Small Axe Project. We aim to provide a space for debate and sustained critical thinking, and to do so with an eye fixed on a particular kind of present and future. As the academy increasingly embraces the “digital turn,” we ask what spaces or paths Caribbean Studies must occupy and travel with respect thereto. *sx archipelagos* features three distinct valences of critical production: “traditional,” multi-media enriched, text-based scholarly articles; digital scholarship projects; and digital project reviews. *sx archipelagos* is committed to empowering Caribbean and Caribbeanist scholars, artists, and other social and creative actors in their efforts to deploy the tools of our time.
